

Richmond Sports Groups Support from BC Government Gaming Grants

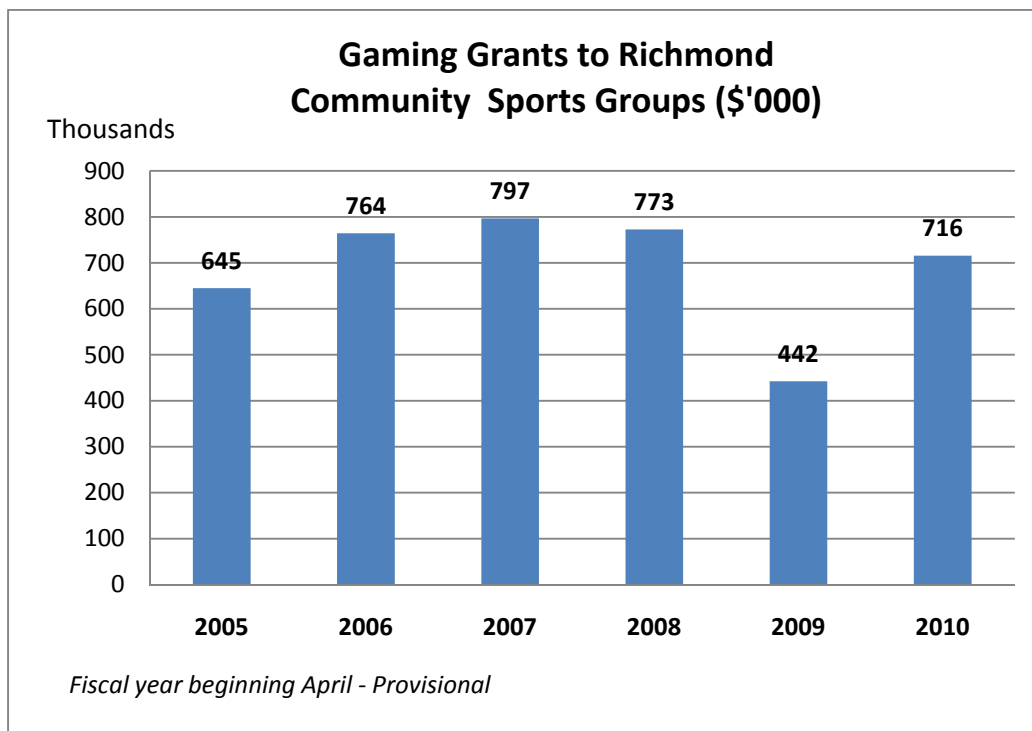

The BC Government offers grants from the revenue received from commercial gaming in BC to community non-profit organizations delivering a program that benefits the broader community. Net government revenues from gaming (after prizes, expenses, etc.) totalled about \$1.1 billion in 2009/10. Grants to non-profit community organizations from that revenue were \$113 million (10.4%).

This report updates information on the BC Government Gaming Grants received by Richmond community sports groups in the current year, beginning April 2010. This includes all the Richmond sports community group grants listed on the Government web-site, plus others known from groups. (If your group is missing, or the information is incorrect, please advise). It does not include grants to provincial sports bodies that happen to have their office in Richmond.

BC Government Gaming Grants to Richmond community sports groups in 2010 totalled \$716,000. This represented a good recovery from the 2009 prior year (\$442,000). In 2009, adult groups were disqualified from applying for grants, and many youth groups suffered cuts of 70 percent from their previous grant level. While not yet back to the support of 2006-8, for the most part, youth sports grants appear to have been re-established at an average of about 85 percent of the prior level.

Below is a summary graph, details by club are overleaf. Richmond's sport groups appreciate and acknowledge this financial assistance.
